

Patient Dental Report

Patient Name: Shahed
Doctor Name: Dr. Jiao Yang
Specialization: Dentist

Diagnosis:

The patient presented with moderate tooth sensitivity and mild gum inflammation. No major cavities were detected, but early signs of enamel wear were observed.

Treatment Provided:

Professional dental cleaning was performed. Fluoride treatment was applied to strengthen enamel and reduce sensitivity.

Prescribed Medication:

Desensitizing toothpaste twice daily and antibacterial mouthwash for 7 days.

Doctor's Notes:

Patient is advised to avoid extremely hot or cold foods and maintain proper oral hygiene. Follow-up visit recommended after 6 months.
